DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with LeLand Weisner on 11/22/2005.

The application has been amended as follows:

In claim 11, on line 3, "a second photosensor" has been change to "a second photosensor array".

In claim 22, on line 3, "a second photosensor" has been change to "a second photosensor array".

In claim 25, on line 1, "23" has been changed to "24".

In claim 26, on line 1, "23" has been changed to "24".

In claim 27, on line 1, "23" has been changed to "24".

In claim 28, on line 1, "23" has been changed to "24".

In claim 30, on line 1, "28" has been changed to "29".

In claim 31, on line 1, "28" has been changed to "29".

Allowable Subject Matter

Claims 1-31 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art fails to teach an inkjet printer and its method for detecting printhead rotation, among other features, comprising: at least one photosensor coupled to a carriage for receiving an initial image and a subsequent image of a pattern taken from a medium; and a printer controller to compare the images and identify a rotation of the printhead in the inkjet printer if the comparison indicates the initial image is rotated relative to the subsequent image.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1) Chong Hin US2005/0024414 discloses a printer comprising: a printhead; a sensor for taking consecutive images of a medium as the printhead passes over; and determine a position of the sensor associated with the printhead relative to the medium.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony Lu whose telephone number is 5712728448. The examiner can normally be reached on M-F 9:00am- 6:00pm.
